

Learn How to Build a Wooden Kayak or Canoe

Starts February 3rd, 2009

Learn how to build a fine wood/epoxy canoe using the strip-built technique. Students will work as a group to build a 15' Prospector Ranger canoe, originally designed by the Chestnut Canoe Company. Each class session includes hands-on demonstration and application of techniques. Building methods will transfer between kayaks, canoes, duck, and drift boats. Parents with children older than 12 are encouraged to sign up. Greg Bridges teaches the same class through COCC in the fall and has a wait list.

Dates: February 3rd until March 31st
on Tuesdays and alternate Thursdays
Time: 6 pm-9pm
Location: Private Shop in Tumalo
Cost: \$220
